INTRODUCTION

Introduction: The 32 Hex Panel IP/32 Hex Panel IP Pearl is a DMX intelligent, IP rated LED wash fixture that can be used in a stand alone mode or connected in a Primary/Secondary configuration. This fixture has five operating modes: RGBWA + UV dimmer mode, Static Color mode, Auto Run mode, Color Macro mode, and DMX control. **This product is intended to be used by professionally trained personnel only and is not suitable for private use.**

Unpacking: Every device has been thoroughly tested and has been shipped in perfect operating condition. Carefully check the shipping carton for damage that may have occurred during shipping. If the carton is damaged, carefully inspect the device for damage, and be sure all accessories necessary to install and operate the device have arrived intact. In the event damage has been found or parts are missing, please contact our customer support team for further instructions. Please do not return this device to your dealer without first contacting customer support. Please do not discard the shipping carton in the trash. Please recycle whenever possible.

CAUTION! There are no user serviceable parts inside this unit. Do not attempt any repairs yourself, as doing so will void your manufacturer's warranty. In the unlikely event your unit may require service, please contact ADJ Products, LLC.

LIMITED WARRANTY (USA ONLY)

- A. ADJ Products, LLC hereby warrants, to the original purchaser, ADJ Products, LLC products to be free of manufacturing defects in material and workmanship for a prescribed period from the date of purchase (see specific warranty period on reverse). This warranty shall be valid only if the product is purchased within the United States of America, including possessions and territories. It is the owner's responsibility to establish the date and place of purchase by acceptable evidence, at the time service is sought.
- B. For warranty service, you must obtain a Return Authorization number (RA#) before sending back the product-please contact ADJ Products, LLC Service Department at 800-322-6337. Send the product only to the ADJ Products, LLC factory. All shipping charges must be pre-paid. If the requested repairs or service (including parts replacement) are within the terms of this warranty, ADJ Products, LLC will pay return shipping charges only to a designated point within the United States. If the entire instrument is sent, it must be shipped in its original package. No accessories should be shipped with the product. If any accessories are shipped with the product, ADJ Products, LLC shall have no liability whatsoever for loss of or damage to any such accessories, or for the safe return thereof.
- C. This warranty is void if the serial number has been altered or removed; if the product is modified in any manner which ADJ Products, LLC concludes, after inspection, affects the reliability of the product, if the product has been repaired or service by anyone other than ADJ Products, LLC factory unless prior written authorization was issued to purchaser by ADJ Products, LLC; if the product is damaged because not properly maintained as set forth in the instruction manual.
- D. This is not a service contract, and this warranty does not include maintenance, cleaning or periodic check up. During the period specified above, ADJ Products, LLC will replace defective parts at its expense with new or refurbished parts, and will absorb all expenses for warrant service and repair labor by reason of defects in material or workmanship. The sole responsibility of ADJ Products, LLC under this warranty shall be limited to the repair of the product, or replacement thereof, including parts, at the sole discretion of ADJ Products, LLC. All products covered by this warranty were manufactured after August 15, 2012, and bear identifying marks to that effect.
- E. ADJ Products, LLC reserves the right to make changes in design and/or improvements upon its products without any obligation to include these changes in any products theretofore manufactured.
- F. No warranty, whether expressed or implied, is given or made with respect to any accessory supplied with products described above. Except to the extent prohibited by applicable law, all implied warranties made by ADJ Products, LLC in connection with this product, including warranties of merchantability or fitness, are limited in duration to the warranty period set forth above. And no warranties, whether expressed or implied, including warranties of merchantability or fitness, shall apply to this product after said period has expired. The consumer's and/or Dealer's sole remedy shall be such repair or replacement as is expressly provided above; and under no circumstances shall ADJ Products, LLC be liable for any loss or damage, direct or consequential, arising out of the use of, or inability to use, this product.
- G. This warranty is the only written warranty applicable to ADJ Products, LLC Products and supersedes all prior warranties and written descriptions of warranty terms and conditions heretofore published.

LIMITED WARRANTY PERIODS

- **Non L.E.D. Lighting Products = 1-year (365 days) Limited Warranty** (Such as: Special Effect Lighting, Intelligent Lighting, UV lighting, Strobes, Fog Machines, Bubble Machines, Mirror Balls, Par Cans, Trussing, Lighting Stands etc. excluding LED and lamps)
- **Laser Products = 1 Year (365 Days) Limited Warranty** (excludes laser diodes which have 6 month limited warranty)
- **L.E.D. Products = 2-year (730 days) Limited Warranty** (excluding batteries which have a 180 day limited warranty)
Note: 2 Year Warranty only applies to purchases within the United States.
- **StarTec Series = 1 Year Limited Warranty** (excluding batteries which have a 180 day limited warranty)
- **ADJ DMX Controllers = 2 Year (730 Days) Limited Warranty**

WARRANTY REGISTRATION

The 32 Hex Panel IP/32 Hex Panel IP Pearl carries a 2 year limited warranty. Please fill out the enclosed warranty card to validate your purchase. All returned service items whether under warranty or not, must be freight pre-paid and accompany a return authorization (R.A.) number. The R.A. number must be clearly written on the outside of the return package. A brief description of the problem as well as the R.A. number must also be written down on a piece of paper included in the shipping carton. If the unit is under warranty, you must provide a copy of your proof of purchase invoice. You may obtain a R.A. number by contacting our customer support team on our customer support number. All packages returned to the service department not displaying a R.A. number on the outside of the package will be returned to the shipper.

FEATURES

- Multiple Colors
- Five Operating Modes
- Electronic Dimming 0-100%
- DMX-512 Protocol
- IP65 Locking 5-pin XLR Connections In/Out
- Multiple DMX Channel Modes
- Multiple Unit Power Linking (see **Multi Unit Power Linking** section of this manual)

INCLUDED ITEMS

- IP65 Locking Power Cable (x1)
- Magnetic Removable Frost Filter (x1)

SAFETY PRECAUTIONS

FOR YOUR OWN PERSONAL SAFETY, PLEASE READ AND UNDERSTAND THIS MANUAL COMPLETELY BEFORE ATTEMPTING INSTALLATION OR OPERATION OF THIS UNIT!

- **There are no user serviceable parts inside this unit. Do not attempt any repairs yourself, as doing so will void your manufacturer's warranty. Damages resulting from modifications to this fixture and/or the disregard of safety instructions and guidelines in this manual void the manufacturer's warranty and are not subject to any warranty claims and/or repairs.**
- **Do not plug this fixture into a dimmer pack!**
- **Never open this fixture while in use!**
- **Unplug power before servicing!**
- **Never touch the fixture during operation, as the surface of the fixture may be hot!**
- **Keep flammable materials well away from the fixture!**
- **Ensure all connections and end caps are properly sealed with dielectric grease (available at most electrical supply stores) in order to prevent water corrosion and/or short circuiting.**
- **If the fixture is exposed to environmental temperature changes, such as a relocation from a cold outdoor setting to a warm indoor setting, do NOT power the fixture on immediately! Internal condensation resulting from environmental temperature changes can cause internal fixture damage. Leave the fixture powered off, and allow the fixture to reach room temperature before switching the power on.**
- **Never look directly into the light source! Doing so presents a serious risk of retina injury, and can result in blindness! Sensitive persons may also suffer an epileptic shock!**
- Ensure that the power outlet is rated for the same voltage that your unit requires.
- Do not attempt to operate this unit if the power cord is frayed or broken.
- Do not attempt to remove or break off the ground prong from the electrical cord. This prong is used to reduce the risk of electrical shock and fire in the event of an internal short.
- Disconnect from power before making any type of connection.
- Do not remove the cover for any reason. There are no user serviceable parts inside.
- Never operate this unit with the cover removed.
- Always mount this unit in an area that will allow for proper ventilation. Allow about 6" (15cm) between this device and any nearby walls.
- Do not attempt to operate this unit if it has been damaged in any way.
- Always mount this unit in a safe and stable manner.
- Power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the device.
- **Cleaning** - The fixture should be cleaned only as recommended by the manufacturer. See the **Cleaning** section of this manual for details.
- **Heat** - This fixture should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
- The fixture should be serviced by qualified service personnel when the appliance does not appear to operate normally or exhibits a marked change in performance.

SAFETY PRECAUTIONS

**HIGH
INTENSITY
ULTRAVIOLET
LIGHT**

**AVOID DIRECT EYE & SKIN EXPOSURE.
WEAR PROPER EYE & SKIN PROTECTION.
SEE MANUAL FOR SAFETY INSTRUCTIONS.**

RISK GROUP 3 - RISK OF EXPOSURE TO ULTRAVIOLET (UV) RADIATION!

FIXTURE EMITS HIGH INTENSITY ULTRAVIOLET (UV) LIGHT FROM THE UV LED.

WEAR PROPER EYE AND SKIN PROTECTION.

AVOID PROLONGED PERIODS OF EXPOSURE TO THE UV LED.

AVOID WEARING WHITE COLOR CLOTHING AND/OR USING (UV) PAINTS ON SKIN.

AVOID DIRECT EYE AND/OR SKIN EXPOSURE AT DISTANCES SHORTER THAN 11 feet (3.3m).

DO NOT OPERATE FIXTURE WITH DAMAGED OR MISSING EXTERNAL COVER.

DO NOT LOOK DIRECTLY INTO THE (UV) LIGHT AND/OR VIEW (UV) LIGHT DIRECTLY WITH OPTICAL INSTRUMENTS THAT MAY CONCENTRATE THE LIGHT/RADIATION OUTPUT.

INDIVIDUALS SUFFERING FROM A RANGE OF EYE CONDITIONS, SUNLIGHT EXPOSURE DISORDERS, OR INDIVIDUALS USING PHOTSENSITIVE MEDICATION, MAY EXPERIENCE DISCOMFORT IF EXPOSED TO THE ULTRAVIOLET (UV) LIGHT EMITTED FROM THIS FIXTURE.

IP NOTICE

An IP rated lighting fixture is designed for installation in outdoor environments, and use a special enclosure that effectively protects against the entry of external foreign objects, such as dust and water. The Ingress Protection (IP) rating system is commonly expressed as “IP” followed by a pair of numbers (i.e. IP65), where the numbers signify the degree of protection. The first digit (foreign bodies protection) indicates the extent of protection against the entry of particles, while the second digit (water protection) indicates the extent of protection against the entry of water. **In IP65 rated fixture, such as this one, has been designed and tested to protect completely against all ingress of dust (6) as well as water sprayed by a nozzle from any direction (5).**

Please note: although the fixture is IP65 rated, it is intended only for temporary outdoor usage!

MARINE/COASTAL ENVIRONMENT INSTALLATIONS

This fixture is NOT suitable for marine and/or coastal environment installations. Installing this fixture in a marine and/or coastal environment may cause corrosion and/or excessive wear to the interior and/or exterior components of the fixture. Damages and/or performance issues resulting from installation in a marine and/or coastal setting will void the manufacturer’s warranty and will NOT be subject to any warranty claims and/or repairs.

OVERVIEW

INSTALLATION

- ① OPTIONAL CLAMP (Not Included)
- ② ADJUSTABLE MOUNTING BRACKET
- ③ OPTIONAL OMEGA BRACKET (Not Included)

The 32 Hex Panel IP is fully operational in three different mounting positions: hanging upside-down, mounted sideways on trussing, or set on a flat level surface. Be sure this fixture is kept at least 12m (40ft) away from any flammable materials (decoration etc.). ALWAYS use and install and appropriately rated safety cable as a safety measure to prevent accidental damage and/or injury in the event that the clamp fails.

Screw one clamp into the Omega bracket with an M12 screw and nut. Insert the quick-lock fasteners of the Omega bracket into the matching holes of the adjustable mounting bracket. Tighten the quick-lock fasteners fully clockwise. Pull the safety-cable through the openings located on the rear of the unit and over the trussing system or a safe fixation spot. Insert the end in the carabine and tighten the safety screw.

Always ensure that the unit is firmly fixed to avoid vibration and slipping during operation. Always ensure that the structure to which you are attaching the unit is secure and is able to support at least 10 times the unit's weight. ALWAYS use safety cables that can hold 12 times the weight of the unit when installing the fixture.

This equipment must be installed by a professional, and it must be installed out of the reach of the general public.

Ensure ALL connections and end caps are properly sealed with a non-conductive dielectric grease (available at most electrical supply stores) to prevent water ingress/condensation and/or corrosion.

CONNECTIONS

ENSURE ALL CONNECTIONS AND END CAPS ARE PROPERLY SEALED WITH A DIELECTRIC GREASE (AVAILABLE AT MOST ELECTRICAL SUPPLIERS) TO PREVENT WATER CORROSION AND/OR ELECTRICAL SHORT CIRCUIT.

TO MAINTAIN IP65 RATING INTEGRITY AND PREVENT WATER FROM ENTERING THE FIXTURE, ALL CONNECTION RUBBER CAPS MUST BE SEALED WHEN NOT IN USE.

ACCESSORY INSTALLATION

BARNDOORS

Please note: Barndoors are an optional accessory that must be purchased separately.

1. Install and secure the included magnetic LED array cover. (Note: Not required when using Barn-doors)

2. Place the Barndoor attachment over the front of the unit. Align and insert the 4 barndoor thumb-screws into the matching holes located on each side of unit (2 on each side). Tighten the thumb-screws to secure the barndoors in place. **DO NOT overtighten.**

REMOTE DEVICE MANAGEMENT (RDM)

NOTE: In order for RDM to work properly, RDM enabled equipment must be used throughout the entire system, including DMX data splitters and wireless systems.

Remote Device Management (RDM) is a protocol that sits on top of the DMX512 data standard for lighting, allowing the DMX systems of the fixtures to be modified and monitored remotely. This protocol is ideal for instances in which a unit is installed in a location that is not easily accessible.

With RDM, the DMX512 system becomes bi-directional, allowing a compatible RDM enabled controller to send out a signal to devices on the wire, as well as allowing the fixture to respond (known as a GET command). The controller can then use its SET command to modify settings that would typically have to be changed or viewed directly via the unit's display screen, including the DMX Address, DMX Channel Mode, and Temperature Sensors.

FIXTURE RDM INFORMATION:

RDM Code	Device ID	Device Model ID	Personality ID
1900	xxxx xxxx	1	001 - 6Ch 002 - 8Ch 003 - 10Ch 004 - 11Ch 005 - 16Ch 006 - 48Ch 007 - 57Ch 008 - 96 Ch

Please be aware that **not all RDM devices support all RDM features**, and therefore it is important to check beforehand to ensure that the equipment that you are considering includes all of the features that you require.

The following parameters are accessible in RDM on this device:

Sensor Definition
Sensor Value
Device Model Description
Manufacturer Label
Device Label
DMX Personality
DMX Personality Description
Device Hours

SYSTEM MENU

The fixture features an easy to navigate system menu control panel display where all necessary settings and adjustments can be made (see illustration below). During normal operation, pressing the MENU button once will access the fixture's main menu. Once in the main menu, you can navigate through the different functions and access the sub-menus with the UP and DOWN buttons. When you reach a field that requires adjusting, press the ENTER button to access that field, then use the UP and DOWN buttons to adjust the field. Pressing the ENTER button once more will confirm your setting. You may exit the main menu at any time without making any adjustments by pressing the MENU button.

LCD CONTROL PANEL LOCKOUT

When the Key Lock function is activated, the control panel will automatically lock after a period of inactivity that can be set under the **LCD Set > Backlight** menu.

- When the Key Lock function is set to ON, the control panel will lock and the display will show "LOCKED*****". Press and hold the MODE button for 3 seconds to unlock.
- When the Key Lock function is set to ON1, the control panel will lock and the display will show "LOCKED*****". To unlock the display, press UP, DOWN, UP, DOWN, ENTER.

If the button sequence was entered correctly, the display and control panel will unlock. If the button sequence was entered incorrectly, the display will return to the DMX address display.

SYSTEM MENU

DMX Addressing:

Operating through a DMX controller gives the user the freedom to create custom programs tailored to their own individual needs.

1. To run your fixture in DMX mode, press the MODE button. Use the UP or DOWN buttons to scroll to “Set Addr” and press ENTER. The current DMX address will now be displayed.
2. Use the UP or DOWN buttons to find your desired DMX address, and press ENTER.

DMX Channel Modes:

Use this function to select your desired DMX channel mode. The 32 Hex Panel IP/32 Hex Panel IP Pearl has 7 DMX channel modes: 6/10/11/16/48/57/96.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “User Mode” is displayed and press ENTER to confirm. The current DMX channel mode will now be displayed.
2. Press the UP or DOWN buttons to scroll through the 7 DMX channel modes. When you have found your desired DMX channel mode, press ENTER to confirm your selection or press the MODE button to exit. Refer to the ***DMX Traits*** section of this manual for detailed information.

Dimmer Curve Setting:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Function” is displayed, then press ENTER. Press the UP or DOWN buttons until “DimCurve” is displayed, and press ENTER.
2. Use the UP or DOWN buttons to scroll through the dimmer curves. Press ENTER to confirm your selection, or press the MODE button to exit.
3. There are 5 dimmer curve settings to choose from. Refer to the ***Dimmer Curve Chart*** section of this manual for detailed information.

DMX Lost Setting:

This mode is used to define how the unit reacts when the DMX signal is lost or interrupted. It can also be used to set the operating mode that the unit will default to when powered up.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Function” is displayed, and press ENTER. Press the UP or DOWN buttons until “NODMX” is displayed and press ENTER.
2. Use the UP and DOWN buttons to scroll through the 3 DMX standing states.
 - “Hold” - The fixture will stay in the last DMX set up.
 - “Blackout” - The unit will automatically go into stand by mode.
 - “Program” - The unit will automatically go into Auto Run mode.
3. Use the UP and DOWN buttons to find your desired DMX state and press ENTER to confirm your selection, or press the MODE button to exit without making changes.

Auto Run Mode:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons so that “Menu Function” is displayed, and press ENTER. Press the UP or DOWN buttons until “AUTO RUN FQN” is displayed and press ENTER.
2. Use the UP or DOWN buttons to scroll through the 99 Auto Run programs. Press ENTER to confirm your selection or press the MODE button to exit.

SYSTEM MENU

Static Color Mode, Color Change Mode, and Color Fade Mode:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons to scroll to "Menu Function" and press ENTER. Press the UP or DOWN buttons until ONE of the following running modes is displayed:
 - "1. STATC" - Static Color Mode (Color adjustment and strobing)
 - "2. CHANG" - 15 Color Change Mode (Color changing, change speed adjustment, & strobing)
 - "3. CHANG" - 30 Color Change Mode (Color changing, change speed adjustment, & strobing)
 - "4. FADE" - Color Fade Mode (Color fading, fade speed adjustment, & strobing)
2. Press the ENTER button to select your desired running mode. Use the UP and DOWN buttons to make your desired adjustments. Press the ENTER button each time you are finished making adjustments in the current running mode.

Color Macro Mode:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until "Menu Function" is displayed, and press ENTER.
2. Press the UP or DOWN buttons until "Macros" is displayed and press ENTER.
3. There are 64 colors to choose from. Use the UP and DOWN buttons for find your desired color.
4. Once you have found your desired color, press the ENTER button. Press the MODE button to exit.

LCD Display Settings:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until "Menu Function" is displayed, and press ENTER.
2. Press the UP or DOWN buttons until "LCD.Set" is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through the options, and press ENTER to make your selection.
 - Backlight - Set how long the backlight display will stay on.
 - Key Lock - Control the key lock feature.
 - "OFF" - The keypad is unlocked, simply press the MODE button to activate the keypad.
 - "ON" - This is a simple keypad lock. "LOCKED *****" will be displayed. Press and hold the MODE button for at least 5 seconds to unlock the keypad.
 - "ON1" - This setting is used to prevent the accidental unlocking of the keypad. To unlock the keypad you will have to enter a passcode. "LOCKED *****" will be displayed. To unlock the keypad press UP, DOWN, UP, DOWN, & ENTER in that order.
 - DisFlash - In this function you can activate the display flash.

Default Running Mode:

In this mode you can reset all function settings to their default modes.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until "Menu Function" is displayed and press ENTER.
2. Press the UP or DOWN buttons until "DFSET" displayed, and press ENTER.
3. Use the UP or DOWN button to toggle between "ON" and "OFF". To reset to the default settings, select "ON" and press ENTER.

SYSTEM MENU

Unit Temperature: Switch the temperature setting between celsius or fahrenheit.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Function” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “Temp” is displayed and press ENTER.
3. Use the UP and DOWN buttons to switch between “Fahren” and “Celsius”.
4. Once you have found your desired setting press ENTER to confirm, or press MODE to exit.

White Balance Settings: Adjust RGBWA & UV colors to balance the white color.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Function” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “Settings WhiteBal” is displayed and press ENTER.
3. Use the UP and DOWN buttons to switch between the colors. When you have found the color you wish to adjust, press ENTER. Use the UP or DOWN button to adjust the color values.
4. Once you have made your desired adjustment press ENTER.

Fan Setting: With this function you can adjust the fan speeds.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Function” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “Fan Mode” is displayed, and press ENTER.
3. Use the UP and DOWN buttons to scroll through different frequencies.
4. Once you have found your desired setting, press ENTER.

Frequency Setting: With this function you can adjust the LED refresh frequency.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Function” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “Fre_hz” is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through different frequencies.
4. Once you have found your desired frequency, press ENTER.

Dim Curves Setting: With this function you can select which dim curve the unit will follow.

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Function” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “DimCurve” is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through different settings.
4. Once you have found your desired setting press ENTER.

Time Information:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Info” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “TimeInfo” is displayed and press ENTER.
3. Use the UP and DOWN buttons to scroll through the time information menu.
 - “TimeInfo Current” - This will display the current running time of the fixture in hours.
 - “TimeInfo TotalTim” - This will display the total running time of the fixture in hours.
 - “TimeInfo LastClea” - This will display the last time the running time was cleared.
 - “TimeInfo TimerPIN” - This menu function will allow you to clear the current running time and total running time.

SYSTEM MENU

Temperature Information:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Info” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “Temp Info” is displayed and press ENTER.
3. The current temperature will now be displayed. Press the MENU button to exit.

Model Information:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Info” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “Model Inf” is displayed and press ENTER.
3. The model name will now be displayed. Press the MENU button to exit.

Software Information:

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Menu Info” is displayed and press ENTER.
2. Press the UP or DOWN buttons until “Software” is displayed and press ENTER.
3. The current software version will now be displayed. Press the MENU button to exit.

Secondary Setting: With this function you can set the unit as a “Secondary” in Primary-Secondary configuration.

1. Plug the fixture in and press the MODE button and press the UP or DOWN buttons until “Secondary” is displayed, and press ENTER.
2. The unit is now set as a “Secondary” in a Primary-Secondary configuration.

Strobe Mode: With this function you switch between all LED strobing or Zone strobing. *Note: Strobe Mode works with DMX only. The strobe mode setting will only work with “Random Strobing” in the “Strobe” channel.*

1. Press the MODE button to access the main menu. Press the UP or DOWN buttons until “Strobe Mode” is displayed, and press ENTER.
2. Use the UP or DOWN buttons to switch between Random 1 and Random 2.
3. Random 1 has all LEDs strobing together, and Random 2 will zone strobe.
4. Select your desired strobe mode and press the ENTER button. Press the MODE button to exit.

Manual Control: With this function you can manually adjust the dimmer, colors, and strobing.

1. Plug the fixture in and press the MODE button and press the UP or DOWN buttons until “Manual” is displayed, and press ENTER.
2. Press the UP or DOWN buttons to scroll through dimmer, colors, and strobe.
3. Press ENTER to select the function you would like to adjust and use the UP and DOWN buttons to make the adjustments.
4. Once you have made your desired adjustments, press the ENTER button.

DMX SET UP

DMX-512: DMX is short for Digital Multiplex. This is a universal protocol used as a form of communication between intelligent fixtures and controllers. A DMX controller sends DMX data instructions from the controller to the fixture. DMX data is sent as serial data that travels from fixture to fixture via the DATA “IN” and DATA “OUT” XLR terminals located on all DMX fixtures (most controllers only have a DATA “OUT” terminal).

DMX Linking: DMX is a language allowing all makes and models of different manufacturers to be linked together and operate from a single controller, as long as all fixtures and the controller are DMX compliant. To ensure proper DMX data transmission, to use the shortest path possible when linking several DMX fixtures. The order in which fixtures are connected in a DMX line does not influence the DMX addressing. For example, a fixture assigned a DMX address of 1 may be placed anywhere in a DMX line: at the beginning, at the end, or anywhere in the middle. When a fixture is assigned a DMX address of 1, the DMX controller knows to send DATA assigned to address 1 to that unit, no matter where it is located in the DMX chain.

Data Cable (DMX Cable) Requirements (For DMX Operation): The 32 Hex Panel IP/32 Hex Panel IP Pearl can be controlled via DMX-512 protocol. The DMX address is set on the back panel of the 32 Hex Panel IP/32 Hex Panel IP Pearl, and the unit and DMX controller require a standard 5-pin XLR connector for data input and data output. We recommend Accu-Cable DMX cables. If you are making your own cables, be sure to use standard 110-120 Ohm shielded cable (This cable may be purchased at almost all pro lighting stores). Your cables should be made with a male XLR connector at one end and a female XLR connector at the other. Also remember that DMX cable must be daisy chained and cannot be split.

Special Note: Line Termination. When longer runs of cable are used, you may need to use a terminator on the last unit to avoid erratic behavior. A terminator is a 110-120 ohm 1/4 watt resistor which is connected between pins 2 and 3 of a male XLR connector (DATA + and DATA -). This unit is inserted in the female XLR connector of the last unit in your daisy chain to terminate the line. Using a cable terminator (ADJ part number Z-DMX/T) will decrease the possibilities of erratic behavior.

TO MAINTAIN IP65 RATING INTEGRITY AND PREVENT WATER FROM ENTERING THE FIXTURE, ALL CONNECTION RUBBER CAPS MUST BE SEALED WHEN NOT IN USE, AND ONLY IP65 RATED POWER AND DATA CABLES SHOULD BE USED.

DMX SET UP

All fixtures should be given a DMX starting address when using a DMX controller, to ensure that the correct fixture responds to the correct control signal. This digital starting address is the channel number from which the fixture starts to “listen” to the digital control signal sent out from the DMX controller. This starting DMX address is assigned by setting the correct DMX address on the digital control display on the fixture.

You can set the same starting address for all fixtures or a group of fixtures, or set different addresses for each individual fixture. Setting all fixtures to the same DMX address will cause all fixtures to react in the same way; in other words, changing the settings of one channel will affect all the fixtures simultaneously.

If you set each fixture to a different DMX address, each unit will start to “listen” to the channel number you have set, based on the quantity of DMX channels of each fixture. That means changing the settings of one channel will only affect the selected fixture.

For example, when in 6 channel mode you should set the starting DMX address of the first unit to 1, the second unit to 7 (1 + 6), the third unit to 13 (1 + 6 + 6), and so on. Please refer to the chart below.

Channel Mode	Unit 1 Address	Unit 2 Address	Unit 3 Address	Unit 4 Address
6 channel	1	7	13	19
8 channel	1	9	17	25
10 channel	1	11	21	31
11 channel	1	12	23	34
16 channel	1	17	33	49
48 channel	1	49	97	145
57 channel	1	58	115	172
96 channel	1	97	193	289

PRIMARY-SECONDARY CONFIGURATION

This function will allow units to be linked together to run in a Primary-Secondary set-up, where one unit will act as the controlling unit and the others will react to the controlling unit's built-in programs. Any unit can act as a Primary or as a Secondary, but only one unit in a linked system can be programmed to act as the Primary.

Primary-Secondary Connections and Settings:

1. Daisy chain your units via the XLR connector on the rear of each unit. Use standard XLR data cables to link your units together. Remember that the male XLR connector is the input and the female XLR connector is the output. The first unit in the chain (primary) will use the female XLR connector only, and the last unit in the chain will use the male XLR connector only.
2. Connect the first "Secondary" unit to the "Primary."
3. Set the "Primary" unit to your desired mode of operation. On the "Secondary" unit(s) press the MODE button and press the UP or DOWN buttons until "Secondary" is displayed and press ENTER.
4. The Secondary unit(s) will now follow the Primary unit.

FIXTURE WITH BARNDOORS INSTALLED

MULTIPLE UNIT POWER LINKING

This feature allows fixtures to be linked together using the power cable input and output sockets.

NOTE: USE CAUTION WHEN POWER LINKING OTHER FIXTURES, AS THE POWER CONSUMPTION OF OTHER MODEL FIXTURES MAY EXCEED THE MAX POWER OUTPUT ON THIS FIXTURE! CHECK SILK SCREEN FOR MAX AMPS.

TROUBLE SHOOTING

Listed below is a common problem that the user may encounter, with possible solutions.

Unit not responding to DMX:

Check that the DMX cables are connected and wired correctly (pin 3 is “hot”; on some other DMX devices pin 2 may be “hot”). Also, check that all cables are connected to the right connectors, as the way in which the inputs and outputs are connected can affect the operation of the device.

CLEANING

Due to fog residue, smoke, and dust, cleaning the internal and external optical lenses must be carried out periodically in order to optimize light output.

- Use normal glass cleaner and a soft cloth to wipe down the outside casing.
- Clean the external optics with glass cleaner and a soft cloth every 20 days.
- Always be sure to dry all parts completely before plugging the unit back in.

Cleaning frequency depends on the environment in which the fixture operates (i.e. smoke, fog residue, dust, dew).

SPECIFICATIONS

Model:	32 Hex Panel IP / 32 Hex Panel IP Pearl
Voltage:	100V - 240V / 50-60 Hz
LEDs:	32 x 12W 6-in-1 Hex LEDs
IP Rating:	IP65
Working Position:	Any safe working position
Power Draw:	298W
Dimensions:	6.5" (L) x 14" (W) x 9" (H) 165.5mm (L) x 354mm (W) x 229mm (H)
Weight:	24.25 Lbs / 11 Kgs
Colors:	RGBWA+UV Color Mixing
DMX Channels:	8 DMX Modes - 6, 8, 10, 11, 16, 48, 57, or 96 channels
Control:	DMX, Standalone, RDM
Warranty:	2 Years (730 days)
Approvals/Rating:	CE certified UKCA

Please Note: Specifications and improvements in the design of this unit and manual are subject to change without notice.
