

AES/EBU

dLIVE DIGITAL AUDIO CARD

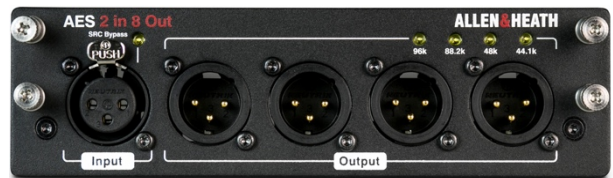

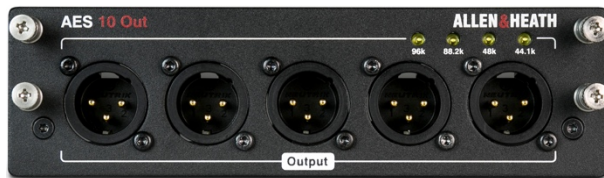

The AES/EBU card is a digital audio interface option for the dLive range.

AES/EBU is an industry standard for digital stereo audio channels.

The AES/EBU card comes in 4 variants of 10out (M-DL-AES10O-A), 2in/8out (M-DL-AES2I8O-A), 4In/6out (M-DL-AES4I6O-A) and 6in/4out (M-DL-AES6I4-A)

All cards' output sample rate can be switched between 96kHz, 88.2kHz, 48kHz & 44.1kHz, while all inputs have an SRC from 32kHz to 192kHz.

The AES/EBU cards are compatible with the dLive product range.

Key Features

- Switchable sample rate on outputs
- SRC on inputs
- 4 configuration option available
- Sync form AES input

Benefits

- AES/EBU (AES 3) compatible
- SRC 32kHz to 192kHz
- Easy upgrade for dLive Surface or MixRack
