

Muo Portable Bluetooth Speaker

Muo reimagines portable audio, encapsulating high fidelity sound in a design made for life on the move. Compact enough to slip into your bag yet powerful enough to fill a room, it delivers rich, layered audio that defies expectations. Every note feels alive: bass with weight you can feel, clarity that reveals forgotten lyrics, and a richness that turns playlists into immersive experiences.

Muo stays in step with your rhythm. Bluetooth® 5.4 aptX Adaptive™ keeps every note perfectly in sync, while the 24-hour¹ battery carries you from morning coffee to late-night unwinding. Take calls in crisp clarity with the built-in microphone, and let the IP67-rated build shrug off downpours, dust, or the chaos of everyday life. Your vibe? Unstoppable.

But Muo isn't just heard—it's seen. Designed by renowned industrial designer Ross Lovegrove, its sculpted silhouette draws inspiration from the iconic Muon HiFi speakers. Crafted for those who demand excellence, Muo translates Muon's sculptural ambition into a portable icon—making a statement as striking as its sound.

High fidelity sound that stuns—even at this size

Get ready to be amazed the moment you hit play. Drawing on over 60 years of acoustic innovation—with no compromises—we've distilled our award-winning speaker expertise into this portable design. Muo delivers powerful bass, crisp details, and room-filling sound, all while defying expectations of what portable audio can achieve.

A highly efficient dedicated racetrack driver has been specifically developed for Muo. With its long excursion and large cone area, it allows Muo to reproduce the lower notes in the bass register with low distortion and low power consumption. The result is a delivery of impressive output and deep controlled bass that punches above its weight whilst ensuring long playback times. Drawing from experience with KEF's award-winning small and powerful KC62 and KC92 subwoofers, P-Flex Technology has been incorporated into the bass driver's surround, which resists deformation otherwise caused by high internal air pressure from the small enclosure; thus avoiding distortion and ensuring a clean bass delivery.

A new dedicated 19mm dome tweeter further improves the high-frequency performance that is characteristic of Muo, conveying a natural and clear reproduction of every musical detail in any listening situation.

Muo incorporates the latest Music Integrity Engine® (MIE), KEF's proprietary suite of advanced DSP algorithms developed for KEF's larger range of HiFi speakers, such as LS60 Wireless. MIE dynamically adapts the music signal to unleash deep bass extension from a small speaker like Muo whilst ensuring control and clarity at all listening levels with any kind of musical content.

With Bluetooth® 5.4 aptX Adaptive™, Muo offers high-fidelity, low-latency audio for seamless listening, delivering exceptional clarity and a reliable connection wherever you go.

Summary of features

- Bluetooth® 5.4 aptX Adaptive™ for high-fidelity and low-latency audio
- A large racetrack driver delivers room-filling sound and powerful bass in a portable design
- P-Flex Surround Technology ensures accurate and detailed bass reproduction
- Music Integrity Engine® (MIE) – KEF proprietary DSP algorithms enhance sound integrity and detail
- Up to 24 hours of play time¹
- IP67 rated design – waterproof and dustproof protection
- Speakerphone for clear voice calls with noise and echo cancellation
- Stereo pair for True Wireless Stereo (TWS) or linking multiple Muo speakers via Auracast™²
- Google Fast Pair and Microsoft Swift Pair
- USB Type-C port for a simple wired connection to laptops
- Design by Ross Lovegrove echoes the distinctive form of KEF's iconic Muon
- Tone-on-tone removable carrying strap
- Available in seven finishes: Silver Dusk, Amber Haze, Orange Moon, Blue Aura, Moss Green, Cocoa Brown, and Midnight Black

¹At moderate volume levels

²Auracast™ works with compatible Android devices, available in late 2025.

Always ready, anywhere

Life doesn't pause—neither does your music. Muo powers through up to 24 hours¹ of playback, carrying you from morning to night and beyond. Short on time? A 15-minute quick charge provides up to 3 hours² of listening, with a full recharge in just 2 hours—so power is never the reason your music stops.

Engineered for the unpredictable, Muo's IP67-rated waterproof and dustproof design protects against rain, sand, and spills, and whatever else life throws your way. With an operating range of -20°C to 45°C, Muo is ready to perform in any climate—whether in freezing winters or scorching heatwaves, ensuring the fun never stops.

The carrying strap makes portability effortless. Grab it, carry it, or hang it in your favourite spot. Wherever you go, Muo follows with seamless ease.

Adapts to your every need

Life moves fast, Muo keeps up. This versatile portable speaker seamlessly integrates into your day, whether for focused work or lively gatherings. Connect effortlessly with Google Fast Pair and Microsoft Swift Pair—a single tap is all it takes. A USB Type-C port offers a simple wired connection to your laptop.

Let your voice be heard, with clarity. The built-in microphone with noise and echo cancellation ensures every word is captured during your calls and catch-ups.

For a truly immersive audio experience, pair two Muo speakers as they awaken into a portable stereo HiFi system—dedicated left and right channels working in harmony to deliver true wireless stereo sound with pristine detail, dimensional depth, and precise spatial imaging. You can also amplify the audio impact by linking multiple Muo speakers via Auracast™², elevating the energy of parties, letting everyone immerse themselves in your curated playlist.

The KEF Connect App puts control at your fingertips. It allows you to manage speaker settings and update firmware, making it easy to control the Muo from a single, intuitive interface.

Design that resonates with you

More than a speaker, Muo is an emotional statement. Designed by Ross Lovegrove, Muo inherits the striking DNA of KEF's flagship Muon HiFi speakers, blending exceptional acoustic engineering with iconic form. Now distilled into a portable form with its iconic silhouette, Muo brings the essence of a HiFi masterpiece into everyday life.

However you like it, wherever you need it, Muo adapts. Its EQ auto-optimises output to suit its orientation, whether standing up or lying down, Muo delivers the same outstanding acoustic depth and definition.

Available in seven vibrant finishes with tone-on-tone carrying straps, including Silver Dusk, Amber Haze, Orange Moon, Blue Aura, Moss Green, Cocoa Brown, and Midnight Black, Muo is crafted from premium aluminium, adding a touch of elegance and sophistication to your everyday life, making it uniquely yours.

Better for the planet

Muo is built with recycled plastic³, transformed from everyday waste like used bottles, discarded home appliances, and even outdated smartphones or laptops. Sustainability meets acoustic excellence, so your music sounds incredible while leaving a lighter footprint.

³All plastic parts in Muo are made from GRS-certified or RoHS-certified post-consumer recycled plastic. The recycled composition ranges from 20% to 90%, depending on the components. The percentage breakdown is based on weight and excludes any plastic found in electronic components.

Specifications

Model	Muo
Dimensions (HWD)	216 × 82 × 59 mm (8.5 × 3.2 × 2.3 in.)
Weight	740 g (1.6 lbs)
Drive units	HF: 20 mm (0.75 in.) MF/LF: 58 × 117 mm (2.5 × 5 in.) supported by P-Flex
Amplifiers	HF: 1 × 10W Class D MF/LF: 1 × 30W Class D
Max SPL measured at 1m	90±3 dB
Frequency response (±3dB) measured at 85dB/1m	43 Hz – 20 kHz
Dust and Waterproof Rating	IP67
Operation Temperature	-20°C to 45°C
Sustainability	Plastic components comprise post-consumer recycled materials

Connectivity

Bluetooth Version	Bluetooth 5.4
APP	KEF Connect
Bluetooth Codecs	aptX Adaptive, SBC, AAC
Wired connectivity	USB-C (Charging and Playback)
Speakerphone	Support noise and echo cancellation
Fast Pairing	Google Fast Pair Microsoft Swift Pair
Supported resolution	aptX Adaptive up to 48 kHz/24 bit USB-C up to 48 kHz/16 bit *Depends on support of the source device
Stereo pairing	True Wireless Stereo (TWS)
Multiple speakers pairing	Supported by Auracast™ *Compatibility depends on source device

Battery

Battery Playtime	Up to 24 Hours *Moderate volume level
Charging Time	Fully charged in 2 hours *Based on 20V1.5A charger
Fast Charging	3 Hours Playtime in 15 mins *Moderate volume level
Finish	Silver Dusk, Amber Haze, Orange Moon, Blue Aura, Moss Green, Cocoa Brown, and Midnight Black
