## BASS REFLEX SUBWOOFER

### Description

S 15 is a high-power, compact subwoofer system ideal for installations where the physically small size and impact of a 15" driver are desired. Extending the frequency response below 35Hz, this highly efficient design is capable of providing output levels normally associated with considerably larger enclosures.

A system suited to music playback in applications ranging from clubs, bars and cafes, right through to theatres and corporate applications. The low-frequency transducer is a 15" woofer with a 2.5" voice coil. Its design is the result of the latest refinements in compact subwoofer production, resulting in a fast and controlled reproduction of the bass frequency range. It is particularly well-suited for high-quality multimedia applications. A single unit can be suspended using the M10 inserts located on the top panel or those on the rear panel.
