

S2 Floor Stand

Stands that deliver

The S2 Floor Stand provides the perfect platform for your speakers to perform. Designed to partner LS50 Meta and LS50 Wireless II, they boast a mounting system with integrated cable management that allows wires to be hidden, and spike discs to protect wooden floors.

Engineered to maximise performance

The S2 Floor Stands are designed by our UK engineering team to ensure your speakers sound their best, and deliver pristine, room-filling sound. They are the ideal height for driver positioning, and their steel plates and fillable aluminium tube structure provide the perfect platform.

Colour matched for your speakers

The S2 Floor Stand's five colours perfectly match the finishes of the LS50 Meta bookshelf speakers and LS50 Wireless II hifi speakers. They are available in: Carbon Black, Titanium Grey, and Mineral White, plus Royal Blue Special Edition (LS50 Meta) and Crimson Red Special Edition (LS50 Wireless II).

Features

- Integrated cable management system cleanly conceals all cables
- Steel and aluminium construction provides rigidity and stability
- Space available for the addition of inert filler for further stability
- Designed for LS50 Meta and LS50 Wireless II
- Available in 5 colours - Carbon Black, Titanium Grey, Mineral White, Royal Blue Special Edition, Crimson Red Special Edition
